

## Help a Young Mother Provide a Hearing Aid and Eyeglasses for her Daughter

Is there any club out there that can talk to Kristiann Spitzer at Westwood College about helping this young student mother provide hearing aid and eyeglasses for her daughter?

Thank you in advance for giving consideration to this child's special needs.

Below is the message from Kristiann:

I am a Student Advisor at a career college in Denver and have many "at-risk" students that I help everyday. One of my students is going through a particularly hard time providing for her special-needs daughter. My student does not qualify for state or federal funding and needs to provide her daughter with a hearing aid and eyeglasses.

I heard that your organization may be able to help in these situations. I tried searching your website for links or more information on how you may be able to help, but couldn't find anything?

Is this something that Kiwanis can help with? If so, what course of action should I take to help my student?

Kristi Spitzer
